

## DR. BYUN IN MEDIA

In April, Dr. Byun was invited to Beijing and Shanghai to participate in a program to help young children. During his four-week stay, he was given the opportunity to improve the lives of several children, as well as bring his extensive surgical knowledge to the medical community there.

His trip was sponsored by the city of Chicago and called “Bridge Across Atlanta.” The purpose of the trip was to spread and share our advanced medical and surgical techniques with the surgeons and physicians of China, so that they, too, can benefit from the advanced technology and knowledge available to mankind today.

The Trip was deemed a success, and Dr. Byun was acclaimed as an expert in pediatric and surgical care.

He combines the functional and aesthetic aspects of treating patients and extends this to his cosmetic practice, creating a perfect fusion of practicality and beauty.

Since he was just named the Chairman of Plastic Surgery for this exchange program, he will continue to be an anchor stone to continue the medical partnership with China, and perhaps lead other trips in the future.
